

Product Overview

Flexi hoses are used to connect taps to the water supply and are an excellent option when space is limited. They feature compression fittings on either end of the hose to make it quick and easy for installers to connect or disconnect fitting. A significant element to ensure you finish your bathroom project professionally.

Features

- + Confined and space saving
- + There are compression fittings on either end of the hose
- + Demountable and re-usable
- + Ideal for where rigid pipe cannot be used

Benefits

- + Ideal for installations that are limited in size and space, for example tap feeds
- + Quick and easy for installers to connect or disconnect fittings
- + Making it easy and hassle-free and enables use for future applications
- + A perfect alternative when the installation does not allow a rigid pipe and an excellent option where space is limited
