

Product Overview

The Sensor Flush uses infrared sensors to detect motion above the cistern and flushes the toilet in response. This automatic function reduces the need for physical contact, which is not only more hygienic for the user but is also considerably easier for those with limited dexterity to operate.

Available separately, the sensor flush is compatible with Navlin and Livenza Plus cisterns with raised push-button flush operation and can be easily installed in place of the push button mechanism.

Features & Benefits

- + Infrared sensor detects movement and operates flush valve as required
- + Offers more hygienic, contact-free flushing compared to traditional lever or button flushes, making it ideal for use in multi-user environments
- + Hands-free operation can be utilised by those with limited dexterity, and can be easily used with a hand, closed fist or elbow
- + Infrared symbol on sensor indicates contact-free use
- + Sensor is located in the centre of the cistern lid for non-handed use
- + Low-depth external sensor is easy to clean with fewer crevices which could harbour dust, dirt and bacteria
- + Battery operated yet flush can still be used if the batteries expire, simply press down like a button flush

Product Codes

Sensor Flush	28404
--------------	-------

Compatible Cisterns

Navlin Cistern with Raised Push Button Flush	23574
