

## Opulence Alcove Top Bifold Shower Enclosure

### Product Overview

The unique characteristics of an Opulence Top Bifold Stable Door shower enclosure support multigenerational living, catering for different generations with different needs who share the same home & bathroom facilities.

Removing a bath can often leave an alcove, a space between 3 walls. By installing an Opulence alcove bifolding shower enclosure you can maximise the shower space with an easy access shower tray or create a large luxurious wet room.

### Features & Benefits

- + Alcove shower enclosures create a shower area between 1200 and 1800mm
- + Supports multigenerational living, but can be used by all members of the household
- + Top bifold stable shower door section opens independently should showering assistance be required for a child or an elderly relative
- + Overall height: 1900mm
- + Bottom door height at 850mm high, so bifold stable door clears standard height pedestal wash basins when opened
- + Aluminium, satin chrome polished wall profiles
- + Coved wall profile will accommodate coved vinyl flooring or use the Square profile for tiled floor or shower tray use (please state when ordering)
- + Solid brass, chrome plated, easy grip door handles & 180° rise & fall hinges
- + Magnetic door closing
- + Can be used on any easy access shower tray, wet room floor former or a shower tray with a 40mm flat area within the AKW & Contour range
