

P12 Waste Pump

Product Overview

The P12 Pump provides silent, reliable and high-performance waste drainage in showering areas where gravity drainage is not achievable.

Quick and easy to install, the P12 Pump is compatible with our wide range of pumped wastes and shower trays. The P12 Pump is suitable for use with electric and mixer showers. When installed with a mixer shower an additional flow switch and flow limiters are required.

Features & Benefits

- + Near silent operation for a relaxed showering experience
- + Reliable peristaltic pump design
- + The control box includes proportional speed control which keeps noise to a minimum when connected to AKW SmartCare Showers
- + Offers a wireless connection to the compatible flow sensor within AKW SmartCare Electric Showers
- + Compatible with AKW wastes (with a 22mm outlet), trays and showers for effortless operation with compatible AKW products for a complete showering solution
- + Standard kits include 1 x flow switch for electric shower installations
- + Low running costs due to the efficient 24v DC motor
- + Link directly to AKW thermostatic showers and models from other brands with a pump control output
