

## Product Overview

Designed for use with AKW SmartCare Plus and SmartCare Lever electric showers, the Remote On/Off Button allows you to start/stop the shower operating wirelessly from up to 10 metres away, offering greater flexibility and preventing users and/or carers from getting wet prematurely or unnecessarily.

## Features & Benefits

- + Soft-press push button is easy to operate
- + Designed to replicate on/off function of power button within shower heater
- + Button switches shower on/off remotely
- + Raised tactile power symbol aids those with visual impairment
- + Small LED light illuminates below the button when shower is in operation; this will flash every 10 seconds to advise when the battery is low
- + Can be installed up to 10m from the shower heater, ensuring the shower can be turned on/off without the user or carer getting wet

## Technical Specification

- + Compatible with AKW SmartCare Plus and SmartCare Lever electric showers only
- + Wall mount using double-sided tape, or fixings (supplied)
- + Requires 1 x CR2032 coin cell battery (not supplied)
