

PRODUCT OVERVIEW

Designed to make the kitchen accessible for everyone, ActivMotion® Rise & Fall Tables are height adjustable at the touch of a button, allowing you to easily modify the height of the worktop to enable access for people with a wide range of accessibility requirements.

Available in a wide range of configurations and lengths, ActivMotion® Rise & Fall Worktops are ideal for the placement of sinks and hobs, with plenty of space underneath for people using wheelchairs to gain access.

FEATURES & BENEFITS

- + Benefits from an adjustable height range of between 680-1100mm, which is easily operated using push button controls that can be positioned for accessibility
- + Actuation technology makes movement near silent and non-intrusive, with a lifting speed of 40mm per second
- + Touch-sensitive sensor strip automatically stops movement if an obstruction is detected - especially useful for people with limited/no feeling in areas of their body
- + Suitable for the placement of gas and electric hobs, as well as sinks, with a range of shallow sinks with insulated bottoms available separately
- + Built-in 10mm rear upstand prevents spills from dripping behind the unit
- + Available as a freestanding worktop with legs, or wall-mounted with modesty panels that match the carcasses for a discreet aesthetic finish
- + Made to measure between 500-3000mm in length with straight or L-shaped configurations available; L-shaped tables can be made up to 3000mm x 3000mm, with up to 4 lifting columns for maximum flexibility
- + Modesty panels are recommended when installing a sink on the worktop as these help to hide any unsightly pipework and keep them out of reach of children
- + Frame design benefits from smooth corners and a low-profile depth
- + Supplied in a complete modular kit that is quick and easy to install

WARRANTY & APPROVALS

- + 2-Year Warranty on ActivMotion® frame
- + 5-Year Warranty on electric components
- + CE approved

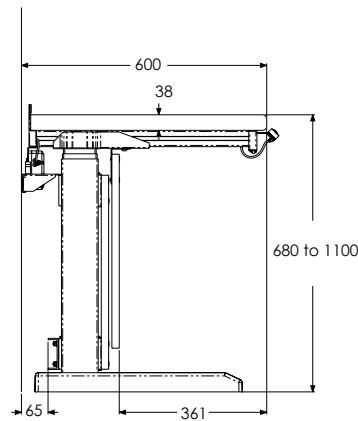

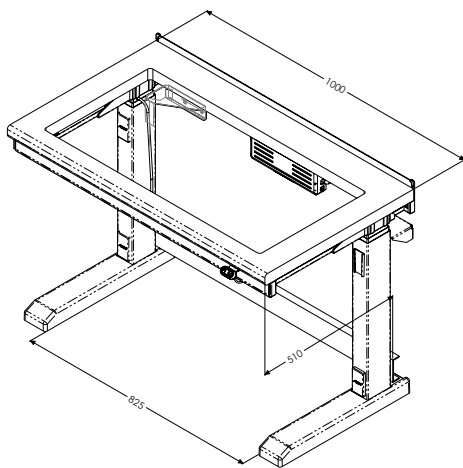

TECHNICAL SPECIFICATION
